

### **Items that were considered, but not included in the Sustainability Plan.**

- From Resource Conservation:
  - **Action Step:** Define areas for enforcement of animal leash laws in open space and include signage identifying those areas. (Currently being addressed).
  - **Action Step:** At all City sponsored events, require disposable food ware to be either compostable or recyclable.
  - **Action Step:** Establish a goal of 25% reduction in waste generated in Broomfield.
- From Renewable and Alternative Energy:
  - **Goal:** The City & County of Broomfield pioneers the research and utilization of new energy solutions and ensures compliance with industry regulations & standards. The City and County of Broomfield will support a stronger school system to be able to compete globally.
  - The specific alternative energies were left out of the plan as emerging technology will drive a lot of this action. The previous **Action Step S-B.3.2 (Revised ES-A.1.3)** read as: The City and County will utilize alternative energy (such as solar, wind, geothermal and “mini” nuclear) in future buildings and facilities whenever feasible.
- From Community Education:
  - **Action Step:** Provide each school with educational short clips that could be used daily with the announcements.
- From Transportation:
  - **Neighborhood electric vehicles were discussed but it was decided that they were not going to be addressed currently.**
