

ITEMS NOT ACCEPTED.....

There are several items that the hauler will NOT pick up during the Spring Cleanup. Here are some suggestions on how to dispose of those items.

Electronic Waste	These items will be accepted at the Household Hazardous Waste (HHW) drop-off event on May 14., by appointment only. Call 303.438.6334 for an appointment. Also check the Yellow Pages for "Electronics Recycling."
Liquid waste of any kind (including paint, peanut oil, fryer oil, etc.)	Solid waste landfills do not accept liquids. Liquids, including latex paint and fryer oil, may be solidified with cat litter or sawdust. Once all the liquid is absorbed and dry, the waste can be bagged and put in regular household trash for pick-up by your regular trash company. For cooking or motor oil, contact Public Works Field Services at 303.438.6334.
Sealed containers or drums larger than five gallons	Contact your regular trash hauler for specific instructions. Note: see liquid waste above.
Any single item that is too big or too heavy to be lifted by two people	These items can be dismantled into smaller manageable pieces and placed at the curb. If you miss that opportunity, you are responsible to take them directly to a landfill or arrange for special pick-up with your regular trash hauler for a fee. (See following page for landfill locations and phone numbers.)
Any appliance with a Freon unit, such as refrigerators, freezers, and air conditioners	Freon is hazardous and requires handling by a state certified operator. Contact your power company (Xcel Energy, United Power) or certified Freon removal company to properly remove your appliances.
Tires	Most tire companies in Broomfield take used tires for a minimal fee.
Cars and car bodies	Check the internet or Yellow Pages for charities that accept vehicles. Also, check with car salvage yards.
Any items listed as a hazardous material; any corrosive, flammable, reactive or combustible materials (including ammunition); pesticides, herbicides, car batteries, antifreeze, motor oil, radioactive materials or pharmaceuticals	Bring to the HHW drop-off day on May 14, by appointment only. Call 303.438.6334 to schedule an appointment. If you miss this opportunity, Broomfield residents can dispose of chemicals year-round at the regional Hazardous Materials Management facility in Boulder at no charge. Contact 720.564.2251 for additional information. Please note that the Boulder facility does not accept electronic waste.
Propane tanks from barbeques or helium tanks	Check the Metro Denver Yellow Pages under "GAS-Propane." Most of the companies will take old propane tanks. Some charge a nominal disposal fee; others recycle them for free (MetroGas, 790 W. 64 th Ave., 303.428.3036 recycles for free.)
Concrete, concrete pavers, bricks, soil, sod, grass clippings	Contact Habitat for Humanity for bricks or pavers. Other items should be delivered to a landfill. (See following page for landfill locations and phone numbers.)
Tree limbs or tree stumps less than 12" diameter, shrubs	Tree limbs less than 12" diameter may be recycled at the Tree Branch Recycling drop-off at 225 Commerce Street on Wednesdays from 1-5 p.m. and Saturdays from 8 a.m. to 5 p.m.
Business, commercial, industrial or agricultural waste	This program is for residents only. Businesses must contract individually for trash collection.
Household trash	Residents must contract individually for curbside pickup of regular household trash. Check Broomfield's website or call 303.469.3301 for list of licensed haulers.
Fire Extinguishers	Look in the Yellow Pages under "Fire Extinguishers."

For more information, contact Public Works at 303.438.6334 or publicworks@broomfield.org.
