

SN	Snow
SL	Sleet/hail
FH	Fog/Haze

5	19-24	Smaller trees sway
6	25-31	Large branches in motion
6+	31+	Whole trees in motion

Please include additional notes and comments below:

Survey was conducted following sustained high winds of 69 mph with gusts up to 86 mph in Broomfield.

Photos below show the nest before and after the wind storm. The nest may have suffered some damage, particularly the nest bowl, but basic external structure of the nest remained intact
