OUR SPACE AND OPERATION

We are hopeful you and your family will enjoy this recreated activity space, *on the current structure*. After extensive tries and outreach for staff and contractors with help for our climbing wall operations, the recreation department was faced with the difficult decision to repurpose the space. Starting in 2020 you will find a new traversing activity available for you and your family to enjoy. In 2021 we will be removing the climbing wall and offering a space that requires less skill specific access for our users. We found that the extensive details of climbing and the growing industry requirements for operations were becoming overly demanding for our recreation setting. In 2021 the space is slotted for a CIP project and will become a multi purpose play space for families and youth. We appreciate your understanding and patience as we go through these phases. Your safety and recreation needs are important to us.
